

CHICOPEE, MASSACHUSETTS

July 7, 2009

*MEETING OPENED BY PRESIDENT ZASKEY AT 7:15 P.M.

PUBLIC INPUT

Stan Kulig and Tom Hamel spoke about MLF-1 the re-certification of the dikes. This will affect flood insurance rate maps.

Timothy Sugrue, 56 Stedman Street, the City Council should consider raising the fine for disturbing the peace. It should be increased because if a policeman has to go to a house more than three times the fine should be more than \$25.00. The noise ordinance should be changed, the hours are not good. Cars with Ghetto blasters are parked in parks for the kids to listen to the music and the police officers don't have the meters to enforce the ordinance.

Melvin Brown, 56 Roy Street, the bike path across from City Hall is a waste of money. The cost is ridiculous. The bike riders should pay for it.

KEITH W. RATTELL
CITY CLERK

DEMERS
PUBLIC SAFETY Comm.

C-1

June 16, 2009

Office of the City Council
274 Front Street
Chicopee, MA 01013
Attn: William M. Zaskey, President

Dear Mr. Zaskey:

The Bureau of Justice Assistance has notified the Chicopee Police Department that we are eligible to receive a Justice Assistance Grant (JAG) through their Programs Division. The eligible allocation amount for this jurisdiction is \$44,244. This is the annual JAG solicitation, which is separate from the recently awarded Recovery Act Justice Assistance Grant. A local match is not required for this grant. The JAG guidelines allow for the purchase of Law Enforcement Equipment as was predicated on past Local Law Enforcement Block Grant Programs.

The Chicopee Police Department will use the grant funds to replace our aging electronic fingerprinting machine. The Chicopee Police arrest and book an average of 1800 people each year. For the past several years, the police department has been using a Live Scan Fingerprinting Identification System to electronically record and send the arrested person's information and fingerprints to the Massachusetts and national fingerprint/criminal records databases.

Our current Live Scan System is a vast improvement over the old ink and paper method of taking fingerprints. Now a suspect's true identity and criminal record are revealed in minutes instead of hours or even days. Nonetheless, the current system has severe limitations and it needs to be replaced for the following reasons:

- The machine is frequently down for repairs. The system's manufacturer no longer provides a maintenance agreement and they will only be able to maintain the system as long as parts remain available.
- It is very difficult, if not impossible, to capture a fingerprint on the current system if the subject's hands are damp, very dry, or contain contaminants.
- Fingerprints of some people with fine or worn friction ridges cannot be captured.

Page 1 of 2

7/7/09: Motion made by Councilor Demers to receive and refer to the Public Safety Committee.
Motion passed.

- Our current system cannot capture a person's palm print. Up to 40 % of prints found at crime scenes come from parts of the hand other than the fingerprints.

The newer system has the ability to quickly and accurately obtain fingerprints from persons that have worn, very dry, or moist fingertips. It also has the ability to capture the details of the person's entire hand – which allows for more suspect identifications.

We anticipate that the allocated amount will cover the entire cost of a new Live Scan Fingerprinting Identification System. Any remaining funds will be used to purchase public safety equipment with priority given to our traffic safety initiatives.

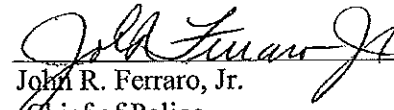

As in the past, there is a federal directive that requires a public hearing regarding the application process and disbursement of JAG funds. I am respectfully requesting that the head of the Public Safety Committee please contact the Chief's Office to schedule a mutually convenient time for the hearing.

This correspondence will serve as notification to the City's governing body, which is the City Council for review and comment. Thank you for your assistance.

Best regards,

Daniel P. Sullivan, Lieutenant
Programs Manager

John R. Ferraro, Jr.
Chief of Police

City Engineer

TO: William M. Zaskey, Chair
Finance Committee

FROM: Stanley W. Kulig

DATE: July 6, 2009

RE: LANDFILL COSTS

Please accept this response to the Council's request for information regarding the eventual closing of the local landfill on New Lombard Road.

1. The current projection indicates that the landfill will reach capacity in 2014. These projections are updated yearly.
2. The City has an agreement with Waste Management Inc. (WMI) that allows disposal of our trash at the landfill as long as landfill capacity is available.
3. Current "Dump Caretaking" costs are approximately \$1 million dollars a year. It is expected that in five (5) years the annual cost of disposal will be about \$1.5 million under the current contract. Once the landfill reaches capacity, it is projected that the City's trash disposal costs would more than double, to about \$3.5 million per year.
4. The current agreement with WMI has a provision that pays the City a "host community fee". This past fiscal year, the City realized a payment of about \$1 million from WMI. It is expected that an annual payment at this level would continue through landfill closure. The host community revenue would stop once the landfill closes.
5. The City has engaged in some preliminary discussions with WMI regarding the future of Chicopee's trash disposal needs. Landfill expansion does not appear to be a viable option at this time. The best current option for post-landfill disposal of Chicopee trash seems to be dumping at a local/regional transfer facility at the increased costs noted earlier.

I look forward to meeting with the Finance Committee to discuss these comments and review any questions you may have.

Mayor Michael Bissonnette
City of Chicopee
17 Springfield Street
Chicopee, MA 01013

Re: Executive Summary
FEMA Certification
DPW Flood Control Repair Project

B.A.

Dear Mayor Bissonnette,

The Chicopee Flood Control Works consists of four separate systems all designed and constructed by the United States Army Corps of Engineers (USACOE) in the 1940's and 1960's. In total there are over six miles of earthen levees and concrete flood walls with eight pump stations which were designed to protect about 1,100 acres of highly developed property up to the flood of record, roughly the 500-year design event.

On January 31, 2007 the City of Chicopee (City) received from the USACOE a notification summary of maintenance deficiency. The City was given until January 30, 2008 to correct the maintenance deficiencies cited and to perform a comprehensive inspection of the flood control system in order to remain on active status within the USACOE Rehabilitation and Inspection Program (RIP). The notification further stated that given the deficiencies, the Flood Protection System may not be recognized in FEMA's revised flood insurance maps.

1. FLOOD CONTROL REPAIR PROGRAM

In order to comply with the many permitting requirements and applicable bid laws the City could not meet the January 30, 2008 deadline, and thus could not participate in the then offered Provisionally Accredited Levee Program. Subsequently, the USACOE placed the entire Flood Control Works into 'inactive' status. Although we could not meet the deadlines, the City proceeded to invest millions of dollars of local money in upgrades to the flood control system. **The cited maintenance deficiencies have been corrected and the comprehensive inspection completed. The City anticipates being returned to 'active status' within the RIP following the USACOE's inspection conducted June 3rd, 4th, and 5th, 2009.**

S:\DATA\WORD97\OFFICE97\LETTERS\City Departments\Mayor 07 Flood Control certification B.doc

Water Pollution Control

2. FEMA CERTIFICATION AND TIMELINE

FEMA is scheduled to publish the final flood maps in June 2010. Chicopee levee's system has already been removed from the draft flood insurance rate maps. As it stands now, the June 2010 maps will show flood plains as if there were no levees at all in the City.

To change these draft FIRMS (Flood Insurance Rate Maps), we must submit certification data by January 2010. The certification process usually takes about eight (8) months, so we are already behind schedule, but could possibly meet the January deadline if we start work now and maximize our efforts. The estimated cost to do the engineering for the FEMA certification is \$1.3 million.

Even if the City does not meet the January 2010 certification deadline, FEMA will re-map at a later date once certification materials/data are finally received. However, the process to change the FIRMS would take a minimum of 18 months and homeowners/businesses will be liable for higher flood insurance rates in the interim.

3. RESIDENT/BUSINESS FLOOD INSURANCE RATES

If the City does not complete the FEMA certification process, property owners in the flood zone could be paying flood insurance up to \$2,500/year. Properties that are mortgaged will certainly be required to have flood insurance, and could pay increased rates. We have been told that banks will be notified of the change to the FIRMS, and will probably start notifying mortgage holder of flood insurance requirements this October.

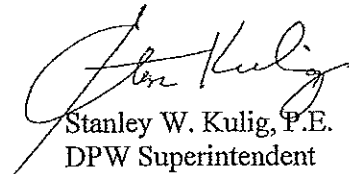

There is some relatively good news, though. If property owners purchase flood insurance by the end of 2009 through the National Flood Insurance Program, they can be "grandfathered" at the old rates which will stay in effect no matter what the new maps indicate. **I believe it is important for the City to take the proactive step of notifying all property owners in the flood zone of this grandfathering provision.** If rate payers take advantage of these lower grandfathered rates, the collective savings in annual premium across all flood zone properties could approach \$2 million. It is estimated that the average cost of flood insurance at the old rates would be \$300 - \$400 per year as opposed to the \$2,500 noted above.

4. OTHER CONCERNS

The recently completed and projected improvements have greatly increased our maintenance responsibilities. There will be a need for increased staffing and annual funding to maintain the improvements.

I trust this overview of flood mapping and flood control issues is helpful. Please let me know when you wish to discuss further.

Very Truly Yours,
DEPARTMENT OF PUBLIC WORKS

RE: **FLOOD CONTROL FEMA CERTIFICATION
FLOOD INSURANCE RATE MAPS**

Dear Mayor Bissonnette

As you are aware, the Federal Emergency Management Agency (FEMA) has embarked on a modernization program for the Flood Insurance Rate Maps (FIRMS) across the entire country. While the currently identified system deficiencies are systematically being corrected, FEMA will still decertify the flood control system unless the City conducts an engineering evaluation of the flood control works according to 44 CFR Section 65.10. Once decertified, FEMA will demarcate the 100 year flood zone which is primarily located in residential areas of Chicopee.

The immediate concerns are:

1. **FEMA CERTIFICATION AND TIMELINE**

FEMA is scheduled to publish the final flood maps in June 2010. Chicopee's levee system has already been removed from the draft flood insurance rate maps. As it stands now, the June 2010 maps will show flood plains as if there were no levees at all in the City.

To change these draft FIRMS, we must submit certification data by January 2010. The certification process usually takes about eight (8) months, so we are already behind schedule, but could possibly meet the January deadline if we start work now and maximize our efforts. The certification process is expensive because the requirements of 44CFR 65.10(e) state:

"Data submitted to support that a given levee system complies with the structural requirements set forth in paragraphs (b) (1) through (b) (7) of this section must be certified by a registered professional engineer. Also, certified as-builts plans of the levee must be submitted. Certifications are subject to the definition given in 65.2 of this subchapter."

Water Pollution Control

80 MEDINA STREET • CHICOPEE, MA 01013-1041 • TEL. (413) 594-3585 FAX # (413) 594-3588

The estimated cost to complete the certification process by area is as follows:

Willimansett	\$ 661,000
Plainfield Street	\$ 87,000
Ames Privilege/Delta Park	\$ 176,000
Chicopee Falls (Facemate/Uniroyal)	\$ 188,000
Contingency	<u>\$ 188,000</u>

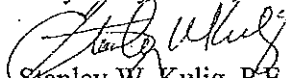

Total Estimated Certification Cost \$1,300,000

Funding:

I respectfully request that an additional \$ 1,300,000 be appropriated to the appropriate Flood Control account to continue this work.

This funding request is for the engineering portion of the FEMA certification process.

Very Truly Yours,

Stanley W. Kulig, P.E.

July 7, 2009

BE IT ORDAINED by the City Council that the Code of the City of Chicopee for the Year 1991, as amended, be and hereby is further amended as follows:

Chapter 46 Law Department

Delete Chapter 46-13
Add Chapter 46-13

46-13 Out-of-court settlements.

All out-of-court settlements shall be made subject to the approval of the appropriating body except as provided herein. The City Solicitor shall be authorized to settle claims for personal injury or property damage for any amount at or below the limit as may be set, from time to time, for the Small Claims actions in the District Court. The City Solicitor shall report annually to the Mayor and the City Council regarding the number of claims so settled and the amount paid for each such settled claim. The authority to settle claims as provided in this section is subject to municipal appropriation. Nothing in this ordinance shall interfere with the authority of a duly authorized and funded Claims and accounts committee of the City Council.
